OFFER N. 2. AREAS WITH HIGHER QUALITY OF TROPHIES

The Czech Republic does not boast the same quality of trophies as other countries. In many areas, trophies generally do not exceed 90 CIC points, equating to no more than 350 grams in net weight. This is because many hunting areas are heavily wooded, with limited meadow and cultivated field space. However, there are various hunting areas across the country with more meadows and cultivated fields where roe bucks with trophies exceeding 100 CIC points, including medals, can be hunted. The best time for this hunt is May–June or the transition between July and August, when the roe deer are rutting.
