HISTORY OF PHEASANT BREEDING IN CZECHIA

According to the legend, the Colchis pheasant (Phasianus Colchicus) was found by so/called Argonauts in Colchis during their research of the Golden Fleece. From Colchis they brought live pheasants to Greece. It is just a legend but it is true that the Greeks and later the Romans contributed to the spread of pheasants across the whole Europe. The Roman poet Giovenale wrote that pheasants were the birds of Scythia, the ancient Central Eurasia region. The Romans used pheasants with their beautiful colours for ornamental purposes in the parks of patrician villas. Only from XI century the pheasants were introduced in European hunting game preserves owned by kings and noble families. The history of pheasant breeding in the Bohemian lands goes back to the 11th century and the first official pheasantry was founded near Králuv Dvůr by the Bohemian king and German Kaiser Charles IV in the 14th century. The breeding and hunting of the pheasant have become so popular here that during the times a specific species called in French Fasan de Boheme or in German der Bohmische Jagdfasan become very popular for its strong and healthily form. The modern driven shooting is connected with the Hasburg imperial house reigning in the Bohemia till the World War One. In the 1845 there were almost 200 pheasant breeding across the country. Nowadays the driven shooting in the Czech Republic boasts great reputation for the quality of birds, excellent organization and maintaining of original tradition connected to the event.
